- **What was the most challenging part?**

The most challenging part was exploring DevTools. I worked through it by opening the **Elements** and **Console** panels and practicing with them.

- **How does it connect to the Web Development Toolchain?**

It showed me how **VS Code**, the browser, **DevTools**, and **GitHub** work together when developing and testing websites.

- **What would you try differently next time?**

Next time, I would follow the instructions step by step and ask for help early if I get stuck.
